Shaping digitalization in the form of self-driving trucks

SCORE

COLD RAIL

Coldrail is a direct rail connection for fresh products between Rotterdam and Spain. This special, temperature-controlled train transports fresh products three times a week. The transport of goods to the Netherlands via this direct rail connection is just as fast as road transport, but much more sustainable because a CO2 reduction of 70%-90% is achieved.

MISSION

Coldrail wants to offer reliable, fast and conditioned service to their customers. We also recognize the importance of reusing and do this in their operations.

FACTS

- 25+ employees
- Head office Rotterdam

AMBITION

Be more sustainable by emitting 70 to 90% less CO2 than road transport.

Making crossing borders and changing drivers more efficient

Digitize more by creating a track and trace

SCORE

CONTIGO

With an annual transport performance of over 2 million TEU, Contigo is one of the market-leading container hinterland logistics networks in Europe. Contigo integrates container traffic between the western ports, the German North Sea ports and the European hinterland.

MISSION

Your satisfaction comes first!

Our in-depth know-how covers all steps of the transport chain. We organize and carry out trimodal container transport between the seaports in Western Europe and the European hinterland and enable an optimized transport solution from a single source. Additionally, we offer you stability and security

FACTS

- Using Trucks, trains and barge operators

AMBITION

Making the modal shift possible by providing services to combine truck, train and barge operations

Fixed routes and frequent scheduled departures form the basis for fast, reliable, efficient container transports

Using specially developed digital solutions that are customized to the company and customer. The transport activities are virtually mapped.

SCORE

CUSTOMS

The customs are responsible for protecting society and promoting international trade by managing the external borders and ensuring the safety of the logistics chain.

MISSION

Customs' mission is to enforce national laws and regulations regarding the import and export of goods and services.

FACTS

- 5.900 employees

AMBITION

Optimal processes contribute to less transport flows in the port with less CO2 emissions consequently

The efficiency of the customs contributes to the attractiveness of the port of Rotterdam

Digitalization contributes to the efficiency of the customs

SCORE

WORLD CONTAINER TERMINAL WCT

WCT is one of world's largest container terminal operators with an ambitious growth plan in Rotterdam at Maasvlakte II. It has announced to expand the terminal capacity, as well as develop empty depots and crossdock and coldstore facilities

MISSION

We serve shipping line and landside customers, seamlessly integrating land and sea to ensure supply chains are safe and undisrupted. Our Safer, Better, Bigger strategy will continue to guide the terminals towards achieving its ambition to be the World's Best Terminal Company by 2026

FACTS

- 64 key locations

AMBITION

By 2040 net zero, pathway defined for energy optimisation, electrification and increase use of renewable energy

Using tools to optimize the use of our equipment which leads to efficiency

Powered by new technologies, we harness the potential of digitalization to lift the standard of connectivity.

SCORE

BAERSK

Increasing complexity in global supply chains is making them inefficient, vulnerable and unsustainable. At Baersk, our strategic vision is to become the Global Integrator, offering truly integrated logistics solutions that connect, protect and simplify our customers' supply chains.

MISSION

Our purpose serves as the foundation and compass guiding our work towards a world where global trade distributes economic and social benefits, without negatively impacting individuals, communities or the environment.

FACTS

- 740 ships
- 100.000 employees

AMBITION

By 2040 being net zero by discovering innovations, strategies and partnerships for decarbonizing

Planning more efficiently which leads to lower costs and a sustainable business

Using technology to merge physical and digital spheres to radically transform the global flow of goods through more open ways of working and shared data models.
